All that counts.

TekGas

The service for our equipment

The new approach that guarantees the right balance between flexibility and quality of services

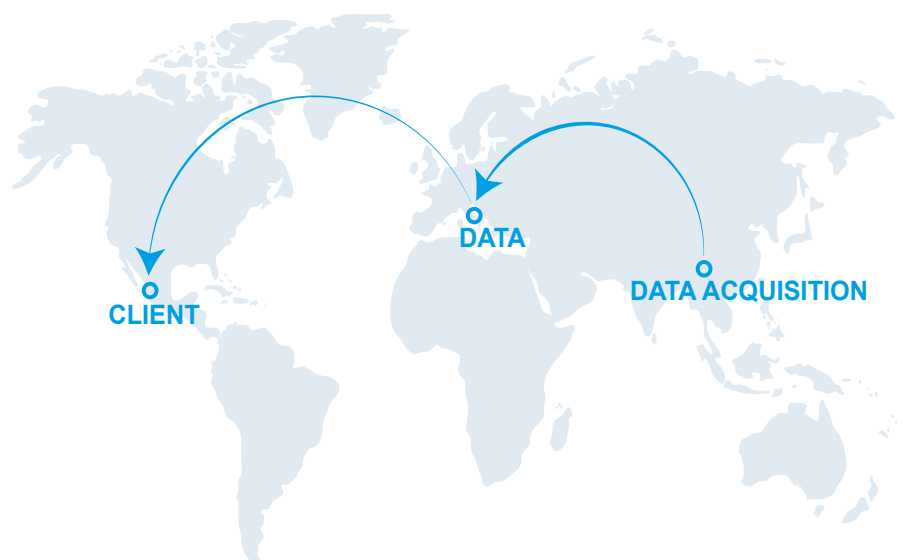

The service offered by Zenner Gas is provided through the WEB application TekGas (SAC) built on state-of-the-art technological support infrastructures (Data Center) and supported by an online technical assistance with a high professional profile (Service Center).

TEKGAS is the WEB service that allows the management of all devices produced by Zenner Gas and other manufacturers.

It is a web platform available everywhere for users and easily integrated on any IT platform. The software guarantees a high level of reliability, availability and confidentiality of information.

The Data Center includes the redundancy of the structure and the backup of the data. Business Continuity and Disaster Recovery are assured by two geographically separate locations in the IT center.

- WEB APPLICATION
Available anytime, anywhere
- INTEGRATION
With all management systems
- CONTACT CENTER
Technical support and assistance
- REDUCTION
of investments
- SAFETY
some data

The Zenner Gas Service Center is a real Contact Center: it provides the customer support service not only through telephone calls but also through other communication tools such as fax, e-mail, web, text messages and apps.

What our service offers

... is the Zenner Gas WEB platform for the management of "Smart Metering" devices to support the services offered by the gas distributor.

The total integration of TekGas in the company IT processes contributes to increase productivity and efficiency.

Everything you need for integration is already present in TekGas and it's free !!!

TekGas provides different ways of transferring data to corporate CRM. From the most trivial extraction on excel file to the use of ftp, Web Services or custom protocols.

Totally transparent in the integrated operation, TekGas deals with the control of Smart devices and the VALIDATION OF THE DATA so that the company processes are sure not to process POSITIVE FALSE.

WEB technology

Data can be viewed via the Internet through direct access to the TekGas platform or by directly integrating its management system with the TekGas data acquisition interface.

Naturally, the security of access to the TekGas portal, controlled by login and password, is guaranteed by all the latest generation intrusion detection systems.

TekGas is supported by a technological infra-structure, in Housing at an ISO 27000 certified Data Center, which is based on a network of servers capable of managing different means of communication, and with great management capacity.

The redundancy of the virtualized structure and the backup of data on differentiated supports ensure continuous operation 24 hours a day, 365 days a year.

TekGas, in completely automatic and transparent mode, sends the data collected by Smart devices to the client company which can use them in order to optimize its logistic management and / or the interventions of the available.
